DECO

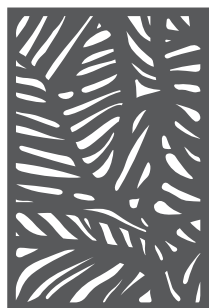

Modular
Decorative
Screen Panels

OUTDECO[®] is the original innovator of Australian hardwood modular outdoor screens. This interior/exterior architectural screening range represents cost-effective, versatile and ready-to-install decorative screens to enhance any building design project big or small, inside or outside. OUTDECO's unique size, format and production system has been specifically engineered and tested to suit North American outdoor conditions.

THE SELECTION

 USA

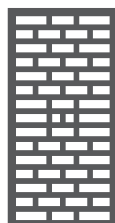

DAINTREE™ 80%

ORIENT™ 90%+

70x48" Series

Offers a larger panel that can be installed faster with less framing-frequent structural supports and a more seamless look.
All Panels 5/16" thk approximately 22lbs

MAHJONG™ 60%

LEAF STREAM™ 60%

BUNGALOW™ 80%

WOOLOOMAI™ 80%

MARRAKESH™ 80%

HERRINGBONE™ 80%

STAR ANAIS™ 90%+

CUMULUS™ 90%+

48x24" Series

Easy to transport, carried and installed safely by 1-person. It's size also governs that it be fixed at more frequent intervals for a very sturdy structure. It can also be 'tiled' repetitively in landscape or portrait to suit a plethora of sizes of installation and contemporary architectural cladding effects.
All Panels 5/16" thk approximately 10lbs

The choice maybe functional or purely personal and stylistic

2 SIZES, 3 PRIVACY RATINGS

60% PRIVACY

Light, open designs are designed less for privacy, more for partial visual partitioning and to create playful effects of light and shadow within an outdoor/indoor space.

80% PRIVACY

With a moderate to high level of privacy, these designs offer the most versatile and desired balance of privacy and 'openness' for many applications. The 80% privacy ratio is directly relevant to many building and boundary applications that require specific compliance. See "Screening Compliance" below.

90%+ PRIVACY

A privacy level that compares to traditional decking timber slat screens or louvered features. The slots are of minimal width, so that at an indirect angle you can not see through, and at a direct angle you can only see tiny slithers of light through the panel. Great for private entrances or high privacy fences. Also great for cladding and boxing features. For example cladding planter boxes or retaining walls, bench-seats storage boxes for pool equipment and utilities etc.

WHY DIFFERENT PRIVACY LEVELS?

The 3 different privacy levels offer engineered levels of screening for personal preference or for privacy (blocking-out the neighbors). The modular nature of the product makes it versatile to a plethora of practical applications and effects, and this variation of privacy level broadens the scope further.

SCREENING COMPLIANCE

The levels also offer a clear designation for compliance to specific building codes and local planning regulations. These regulations can be complex and may vary slightly from region to region, so we advise you do your homework with your building professional or through the local authority.

POOL FENCES

In specific scenarios the high privacy designs have narrow slot details, and may also constitute part of a compliant non-climbable barrier structure or pool fence. See specific details on individual designs and consult relevant authorities or building professional.

THE BACKYARD IN EVOLUTION

The American backyard is a treasured part of our culture and lifestyle. Cook-outs, pool parties and backyard football are all fond childhood memories, but whilst the dream lives on, our aspirations and needs have changed dramatically. We have less time, less space, higher lifestyle aspirations and we are being drawn closer and closer to our neighbors. Our outdoor space is an extension of our living space, to a point where the 2 blend into one big lifestyle space. Extending and beautifying the paling fence or blocking out the neighbors is a universal problem to solve.

Size engineered for less frequent
framing and support

NOW

SUSTAINABLE AUSTRALIAN HARDWOOD

The Soft Warm Organic Feel of Timber

Pictured here is the distinct and beautiful texture of OUTDECO® Decoshield™ Natural Finish. This rich fibrous texture and dark tannin color is the look that OUTDECO® pioneered and is sought for. Without the hard sharp edges and 'hot-plate' heat of steel in the sun, timber offers the look and feel of a sought, warm, organic compliment to living foliage in the landscape, not to mention it is carbon negative as opposed to carbon positive metal options. The core substrate is created from sustainable timber by-product that is only certified new-growth source and, is otherwise waste. Hardwood fibre makes up 97 per cent of the substrate, and amazingly there are no nasty synthetic additives like other composite boards. The hardwood substrate has been proven in building application for decades and OUTDECO's designers, product engineers and industrial chemists, have developed the product over many years.

10 Year Material Warranty

10 YEAR WARRANTY against material rot, bloat or delamination under normal outdoor 'run-off' conditions. Screens mounted in vertical plain, not submerged/ constant contact with water, soil or chemicals. Installations are the responsibility of the installer. Directions must be followed, see online for more details.

PROTECTED BY DECOSHIELD™

Unique to OUTDECO® this finish comes as factory standard, so each panel is ready-to-install in this finish, and can be enjoyed with little to no maintenance. The Decoshield™ system is designed to moderate the weathering process, so that you can enjoy its rustic weathering (preferred by most users), or it is primed to coat in a color (exterior water-base paint of your choice) or top-coated with a decking stain or seal product to keep or bring back the rich dark oiled look. This Penetrating Protective Stain System, is a low VOC, multi-process system which provides even coloring and can not be replicated with common timber decking products applied to generic cut-sheet board.

Sustainably Sourced Australian Hardwood Carbon-Negative Mill from otherwise waste product.

100% Australian Grown, Milled and Made

Durable in Cold and Hot Climates

Resistant to run-off precipitation (when fixed in vertical application above ground position)

Termite Resistant

DECOSHIELD™ NATURAL (WITH REJUVENATING TOP COAT)

For alternative look, see this installation (right), coated (by user) with rejuvenating top-coat.

DECOSHIELD™ NATURAL

Factory standard finish shown here

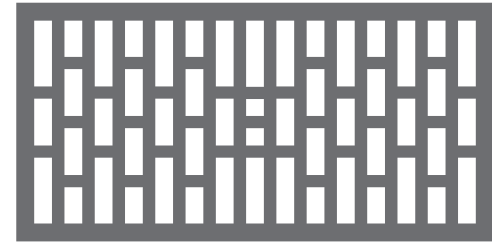

Mahjong™ is one of our 60% privacy/blockout range. Its simple rectangular geometry creates a visual language can be drawn to oriental, art deco or 60s geometry. It's more open and lighter than the 80 or 90%+ designs, so is very effective as partial partitioning within a space, or as a dramatic effect on a wall or fence.

Decoshield™ NATURAL FINISH
shown here with DIY coating
Exterior White Acrylic

Leafstream™ is a 60% Privacy/ Blockout Design. Its flowing organic form is reminiscent of flowing water, leaves or indigenous textures like string fish nets. It creates beautiful shadow effects in natural light and is a perfect compliment to a garden. Compared to our other patterns its very light and open, and is brilliant for ambient visual effects as a suggestive divider, some wall art or vertical interest or even as an internal feature.

BUNGALOW™

OUT
DECO

Bungalow™ is a popular choice in our 80% privacy/ blockout range. It's lineal but organic language has a very strong tie to the natural landscape and can compliment, yet soften vertical structure within a landscape. At 80% privacy/ blockout it is perfect for boundary screening on a fence or wall, great for walling features and many other applications.

Gardenscreen™ Modular Decorative Screen Panels

OUT
DECO

WOOLOOMAI™

Gardenscreen™ Modular Decorative Screen Panels

WOOLOOMAI™ has a loose wavy nature that dances across the surface, evocative of the ocean, an iconic beach theme, river rapids or (in portrait orientation), foliage. Its 80% privacy/ block-out makes it suitable and compliant for most common “boundary fence” scenarios, at height barriers and a plethora of other applications.

HERRINGBONE™ is our unique play on an artisan and architectural pattern that is both contemporary and ancient at the same time. It is reminiscent floor tile of ancient architecture from Europe, to Middle-East and Asia, but also seen in uber-chic fashion textiles of mid-century and now in the edgiest contemporary interiors. The geometry is super simple, but with a little twist to create a zig-zaggy play that will breakup large imposing rectangular surfaces, and offer a complimentary effect to foliage. The pattern has been refined to a 80% privacy level, so that it is compliant for many privacy and boundary applications, and is has a mid-range visual impact for artistic effects.

MARAKESH™

OUT
DECO

This is a brilliant example of an indoor/outdoor feature. This old warehouse space with a full wall of natural light and vintage industrial detailing, but was quite cold, grungy and soul-less. The screen feature wall created needed life and 'pop' with random panels painted in bright colors, and clusters of vertical garden panels. See Coating details to see how this color effect was achieved.

Gardenscreen™ Modular Decorative Screen Panels

CUMULUS™

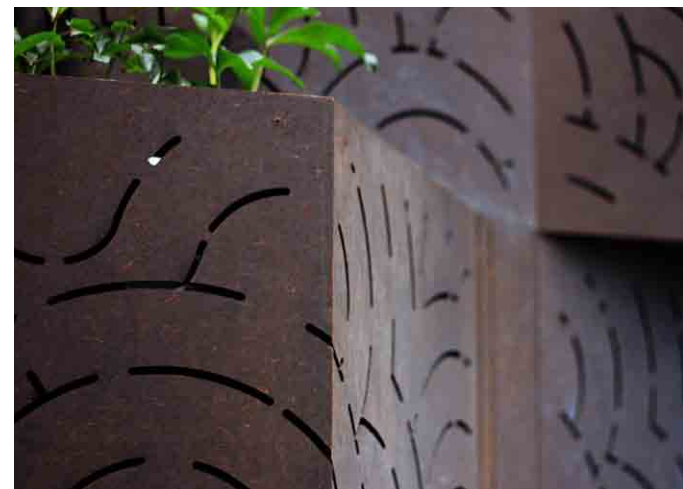

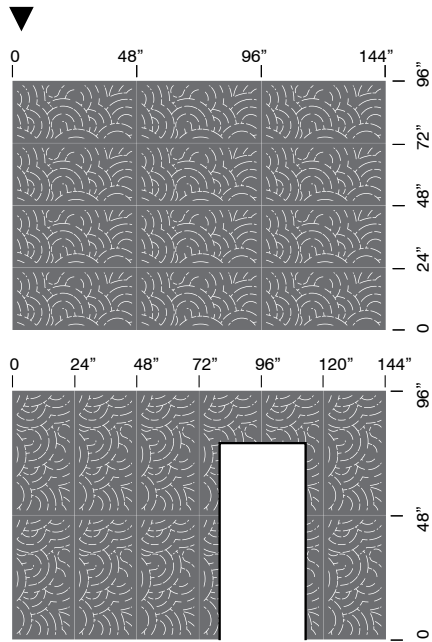

90%+ PRIVACY

48"X24"

Panels 5/16" thk,
approximately 10lbs

MODULAR CLADDING
PATTERN REPEATS FOR INFINITE
SIZE OF INSTALLATION

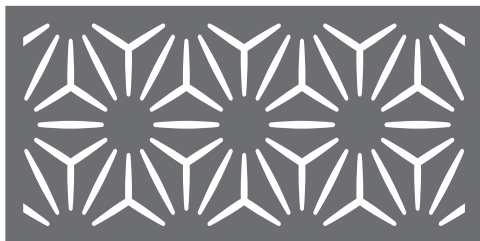

CUMULUS™ is part of the new 90%+ (High Privacy/ Blockout) range. Its circular lines create a light fluffy organic movement across the surface that is reminiscent of fluffy white clouds or layers of foliage. It is both an architectural statement, yet subtle and complimentary within a planted outdoor space. The privacy/ blockout is almost total, making a perfect solution for high privacy or cladding type applications like cladding planter boxes, storage boxes, retainers etc..

STAR ANAIS™

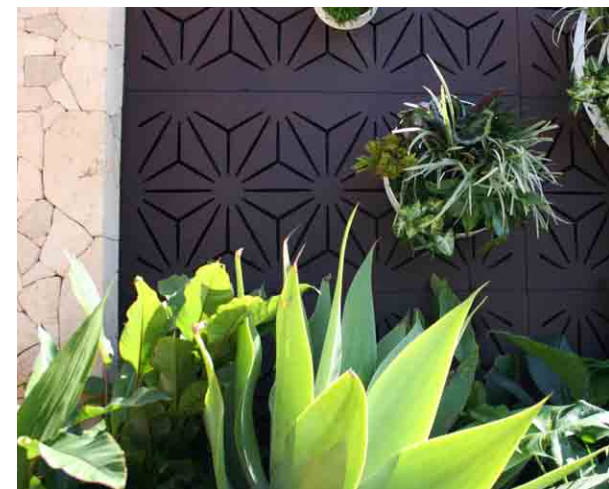

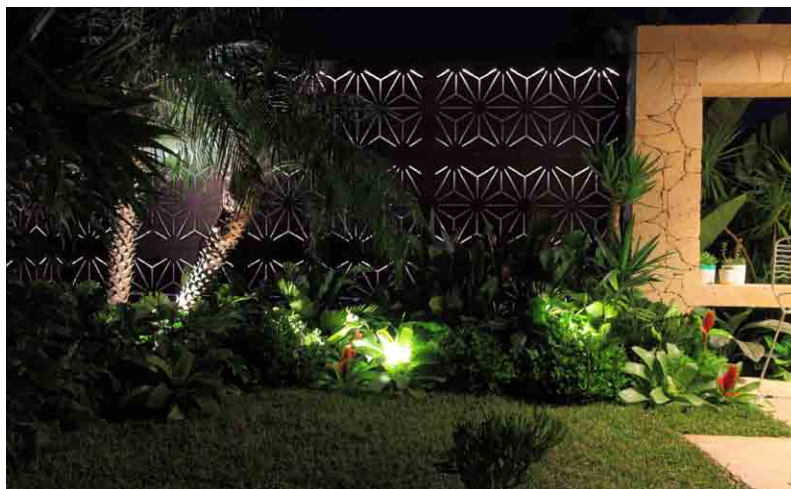

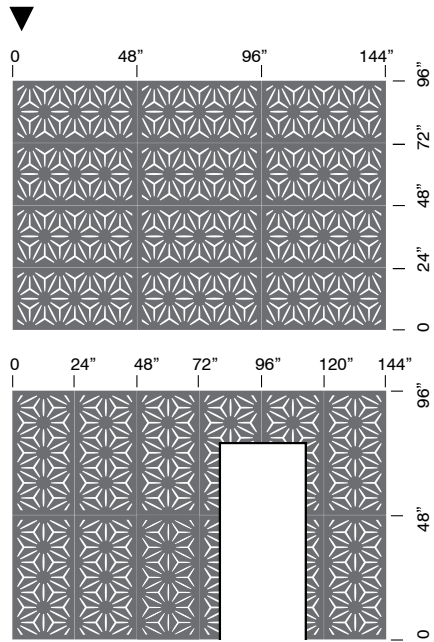

90%+ PRIVACY

48"X24"

Panels 5/16" thk,

new

DAINTREE™

OUT
DECO

DAINTREE™ was inspired by the thick, lush undergrowth of the tropical rainforest of Far North Australia, but creates a great backdrop for any contemporary beach or tropical look. Think hawaiian boardshorts, surfboards, sun-drenched summer days and balmy nights entertaining friends on the deck. This design will fit in any backyard. A tropical feeling with architectural chic...its already a hot seller!

70"x48"

Modular Cladding

Pattern repeats for infinite size of installation

Panels 5/16" thk approximately 22lbs

ORIENT™ is one of our more restrained geometric designs for a more minimal sophisticated architectural look, or for large cladding areas with a stately look. The design has Asian, Moroccan and 20-century modernist influences and suits an ultra-contemporary and eclectic themes. The tight, simple geometry gives it both look and function of authority and security for fences, gates, entrances.

Refreshing stately presence in all white: exterior acrylic

Shown here with LED Backlighting.

ENDLESS OPTIONS

The Gardenscreen range is specifically designed for easy installation, and in the majority of projects the modular panels are installed as is. However the timber substrate is easy to cut to specific sizes or coat for alternative options. Most of the patterns have a directional characteristic, but can be installed in any orientation to create unique effects.

A 'poppy' contemporary look with Japanese influence. Black painted screens, bright structural accents
